Research

- 2020 – present  **Postdoctoral Fellow, Emory University**
Investigated the molecule-solvent interface with high-throughput simulation and machine learning
- 2014 – 2020  **Graduate Research Assistant, Rice University**
Determined optimal adaptive sampling strategies for folding proteins and the upper limit for speed up with adaptive sampling. Developed open-source package ExTASY, a scalable and open-source adaptive sampling platform enabling deep learning: github.com/ClementiGroup/ExTASY. Validated adaptive sampling reaches accurate protein folding and protein dynamics.
- 2012  **Bachelor student, University of Regensburg**
Localized interaction interface between proteins central to polycystic kidney disease with NMR.
